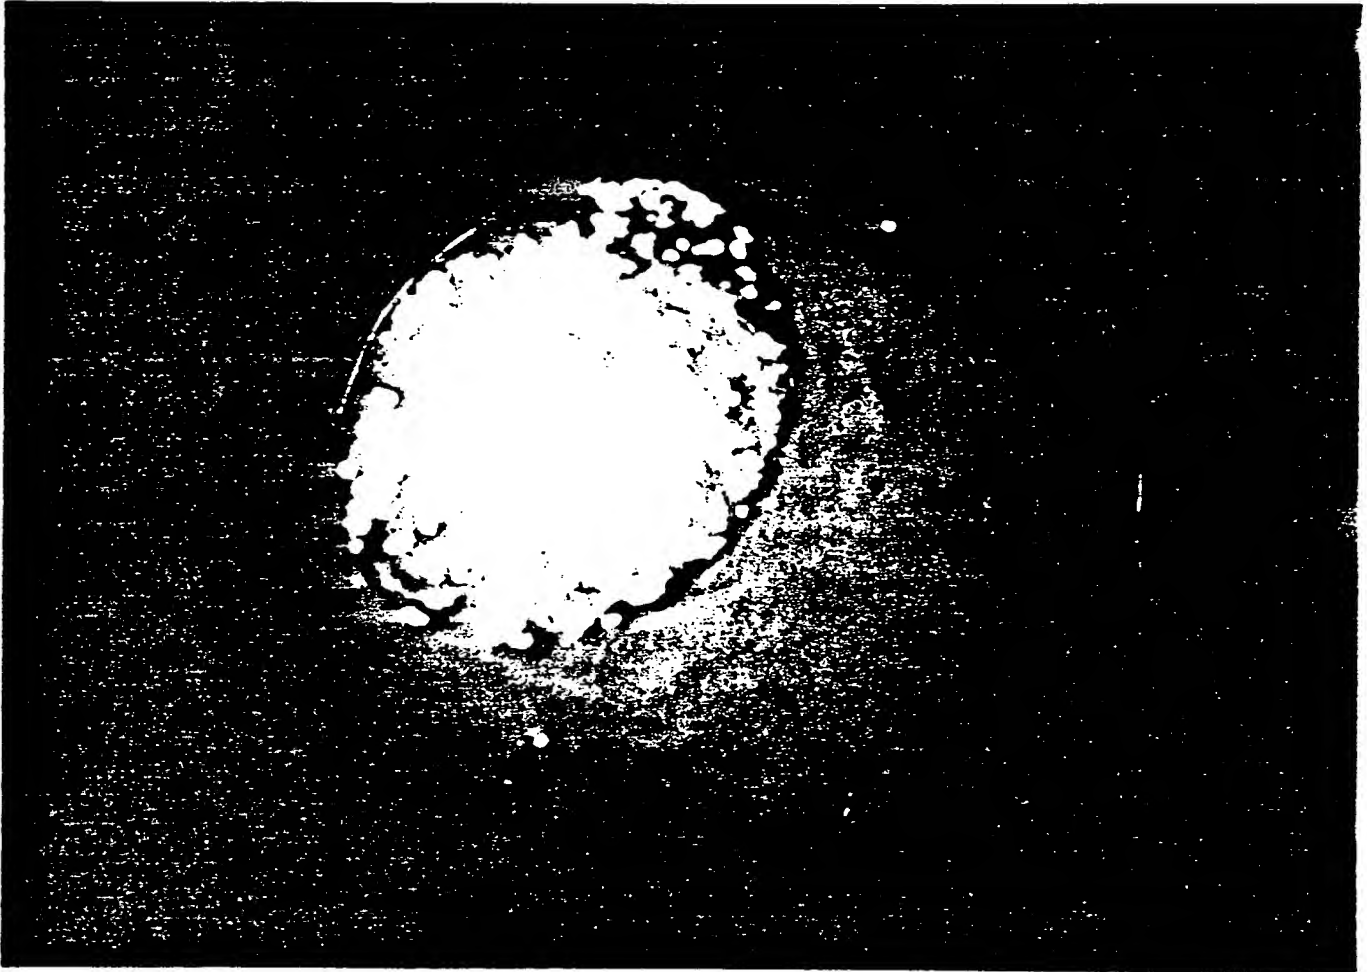

Figure 3

WF -> C57BL/6: Macroencapsulation of islet beads made with 0.5% collagen and 0.5%-5% agarose. Beads were transplanted intraperitoneally on 8/28/93.

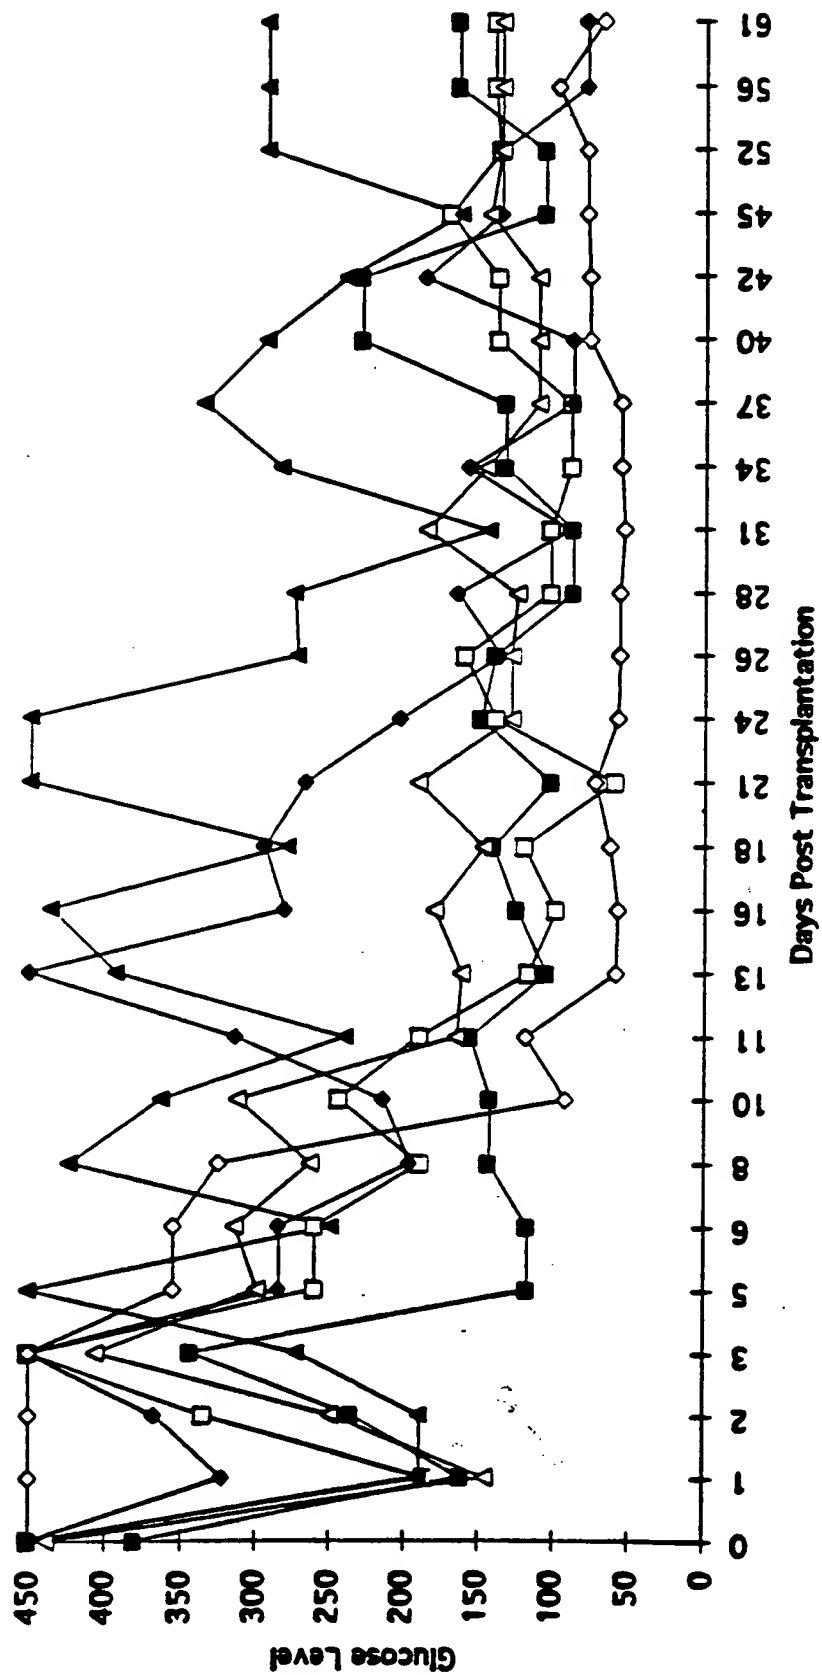

Figure 4

WF -> C57BL/6: Macroencapsulation of islet beads made with 5% agarose and gelfoam. Beads were transplanted intraperitoneally on 8/20/93.

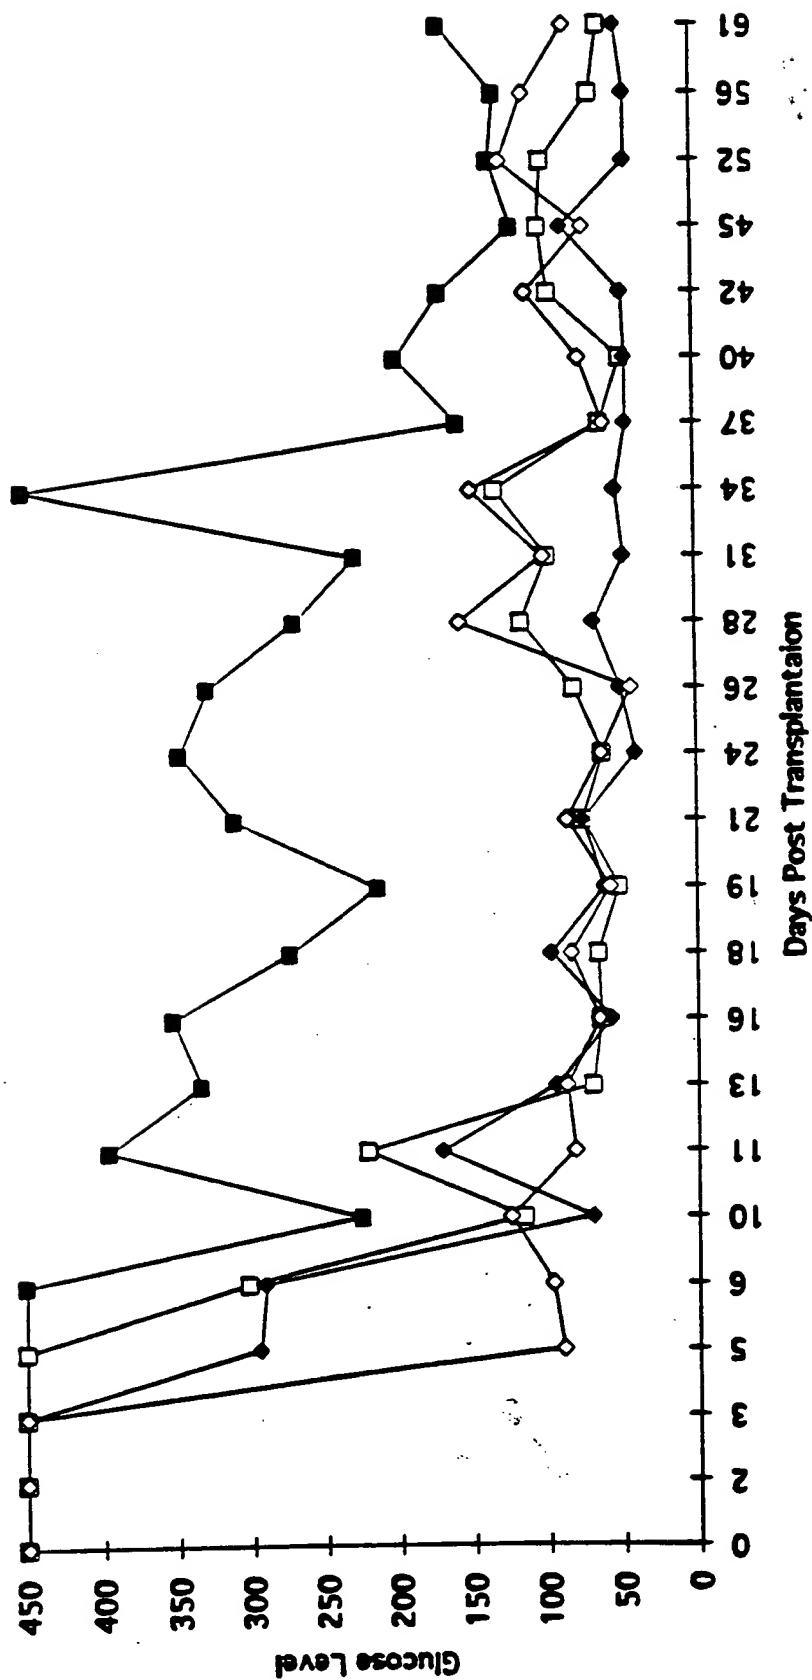

Figure 5

WF -> C57BL/6: Transplantation of macroencapsulated beads made with agarose  
only. Beads were transplanted on

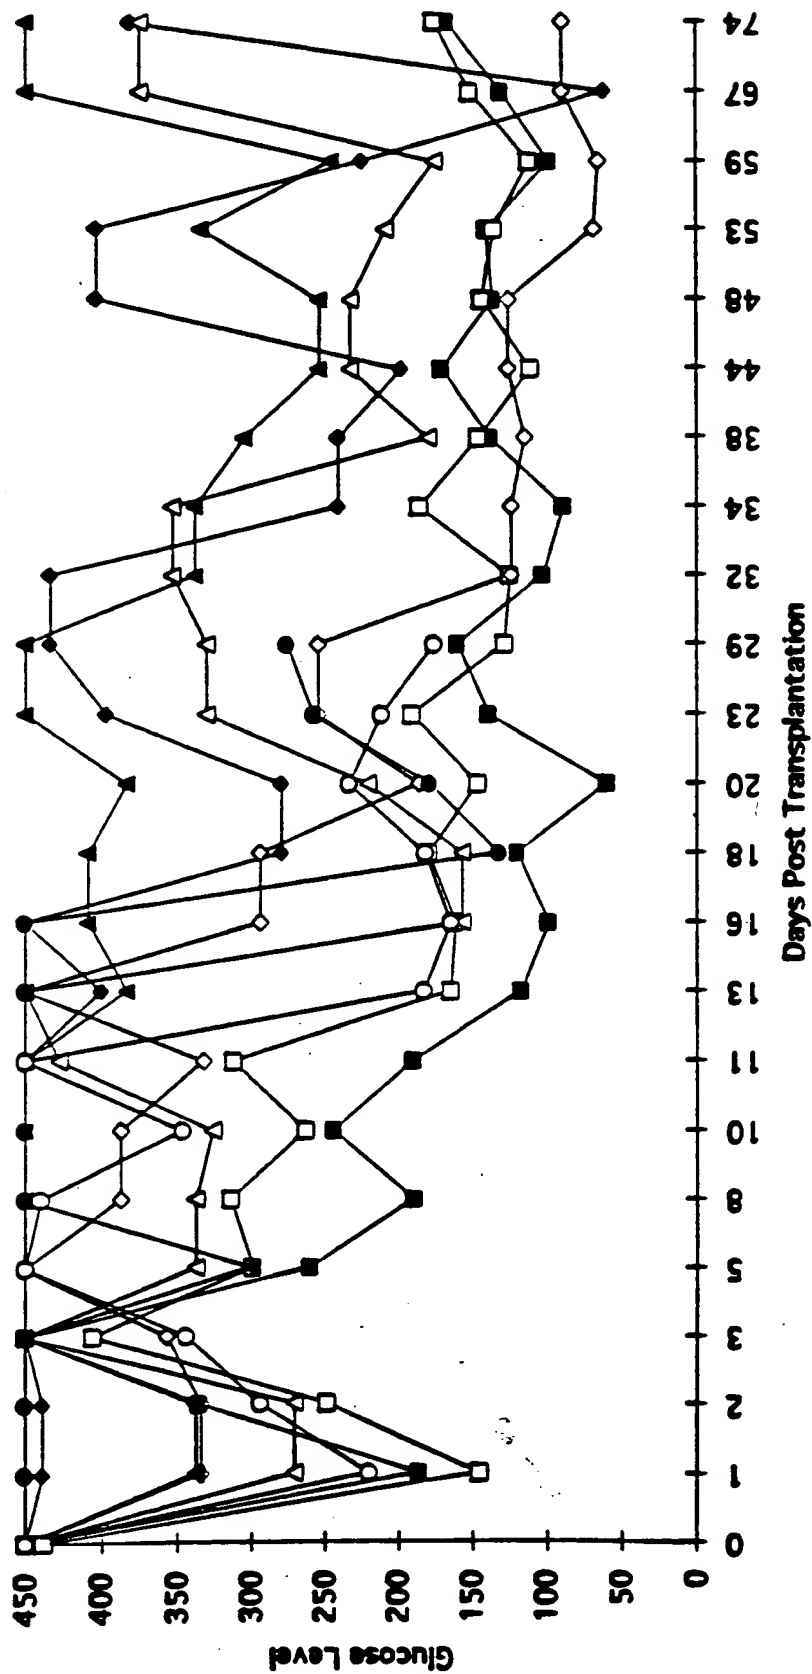

Figure 6

WF -> C57BL/6: Transplantation of free islets. 1000 islets were transplanted intraperitoneally.

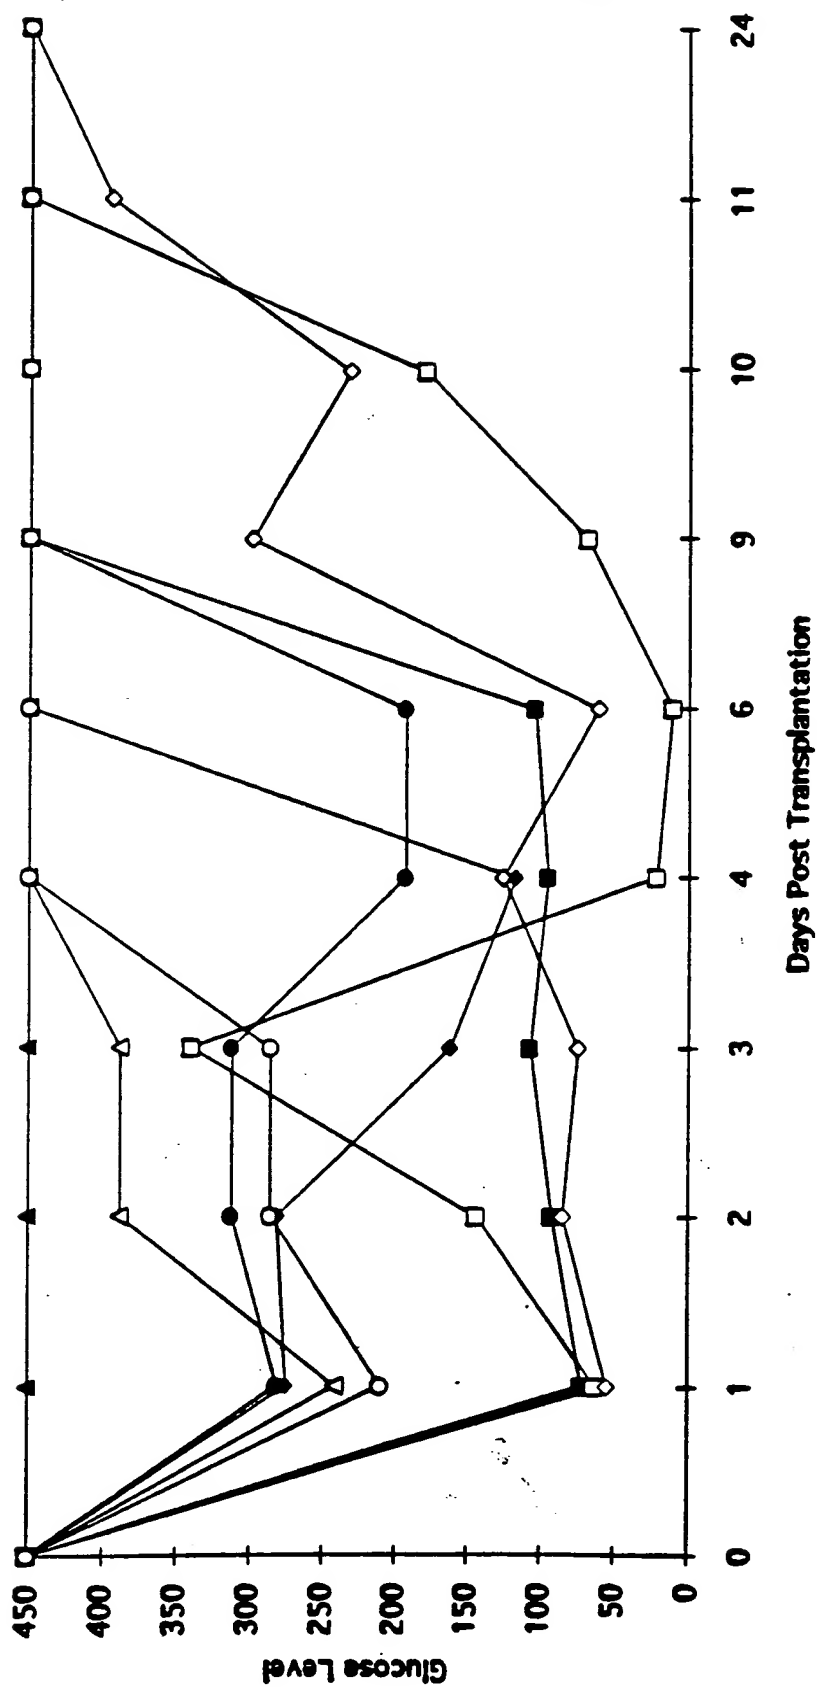

Figure 7

WF -> C57BL/6: Transplantation of empty beads (agarose-collagen & agarose-gelfoam) together with free islets. 1000 islets were transplanted intraperitoneally on 10/8/93.
